

A diagram on a grid. A vertical line segment is drawn from the top edge to a horizontal line. From the left end of this horizontal line, a horizontal line segment extends to the left. Two points are marked with 'x' symbols: one on the left and one on the right, both on the same horizontal level as the horizontal line segment. The point on the left is labeled O and the point on the right is labeled O' .

$O \times$

$\times O'$
